EDUCATION

B.Sc. in Computer Engineering, Computers and Information Technology Oct 2025 - Jun 2029
University POLITEHNICA of Bucharest (UNSTPB)
• Grade: 9.17/10.00 | Specialization: French-Taught Engineering Stream.

PROFESSIONAL EXPERIENCE

Computer Engineering Intern, UMB Grup Jul 2026 - Oct 2026
• Built web applications using a Django/Python backend and HTML/CSS/JS frontend.
• Performed hands-on hardware assembly and precision soldering.

SKILLS

- Programming: C++, Python (Flask, Django), Java, HTML/CSS/JS.
- Databases & Tools: SQLite, REST APIs, Chart.js, Git.
- Technical Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP).

PROJECTS

Real-Time Adaptive Web Interfaces for Accessibility 2026 Scientific Communication Session
• Developed a proactive, full-stack adaptive web system integrating a K-Nearest Neighbors (KNN) machine learning classifier.
• Implemented behavioral tracking of low-level kinematic signals (scroll speed, erratic clicks) to dynamically adapt UI layouts, demonstrating a strong understanding of user interaction and data processing.

Full-Stack IoT Environmental Monitor Aug 2026
• Developed an end-to-end IoT telemetry system integrating an ESP32 microcontroller to read, filter, and transmit real-time sensor data over Wi-Fi.
• Engineered a Python (Flask) RESTful API and SQLite database hosted on a Raspberry Pi to persist data, track device uptime, and serve a dynamic web dashboard featuring live Chart.js visualizations.

ADDITIONAL INFORMATION

- **Languages:** Romanian (Native), English (C2 - Cambridge Certified), French (B1).
- **Certifications:**
 - Certificate in Web Development – Cisco (Dec 2025)
- **Volunteering:**
 - Ajungem MARI Volunteer (2022-2023): Provided weekly mathematics and English tutoring to vulnerable youth, fostering a positive learning environment.
 - Erasmus+ Participant: Active participant in mobility projects focusing on critical thinking and intercultural dialogue.
